

S Satinél®

For Elegant Home Living

Understated Elegance That You Can See and Feel.

When it comes to the designs of our products, our philosophies are timeless elegance and beauty from within. What that means for our customers, is a promise that the products perform beautifully just as they are aesthetically attractive.

Curated Designs

Our selection of well designed and high quality products are specially curated by our team of experts. Our intent is to provide our customers the very best choices, wading through the sea of variables, saving time and energy.

Stainless Steel Range

When it comes to design and build quality, there is still nothing like stainless steel material. All our stainless steel products are designed to be rust-free, corrosion-free, lead-free. For those who are concerned for mother earth, stainless steel products do not require the use of the harmful electroplating process.

Satinel's top-tier range of products made from this premium material is highly recommended for longevity and hygiene reasons.

“Design must seduce, shape, and perhaps most importantly, evoke an emotional response.”

– April Greiman

DISCLAIMER

All pictures shown in this catalogue are for illustration purpose only. Actual product may vary due to product enhancement. Product measurements may vary due to manufacturing processes.
