

S Satinél®

Understated Elegance That You Can See and Feel.

When it comes to the designs of our products, our philosophies are timeless elegance and beauty from within. What that means for our customers, is a promise that the products perform beautifully just as they are aesthetically attractive.

Curated Designs

Our selection of well designed and high quality products are specially curated by our team of experts. Our intent is to provide our customers the very best choices, wading through the sea of variables, saving time and energy.

Stainless Steel Range

When it comes to design and build quality, there is still nothing like stainless steel material. All our stainless steel products are designed to be rust-free, corrosion-free, lead-free. For those who are concerned for mother earth, stainless steel products do not require the use of the harmful electroplating process.

Satinel's top-tier range of products made from this premium material is highly recommended for longevity and hygiene reasons.

“ Design must seduce, shape, and perhaps most importantly, evoke an emotional response.”

– April Greiman

Bathroom

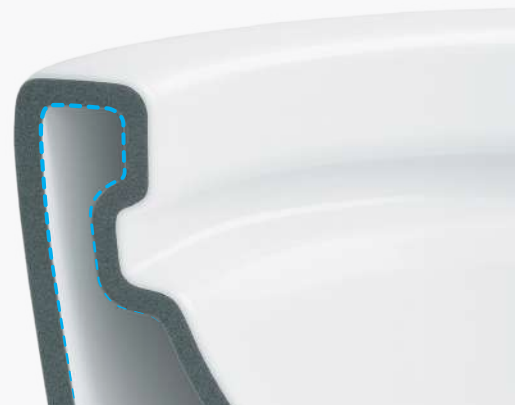

Rimless Water Closet

No Rim. No Hidden Grime. Just Effortless Hygiene.

Traditional toilet rims collect bacteria and grime over time.

Satinél's rimless design removes hidden corners, making every flush cleaner, more hygienic, and easy to maintain, so your toilet stays fresh with less effort.

Satinél's rimless toilet features 360° flushing that reaches every corner of the bowl. Its full-coverage design clears waste cleanly and efficiently, minimising build-up and delivering a consistently thorough rinse from every angle.

Easy-cleaning surface that requires less effort and reduces splashes for a more hygienic clean.

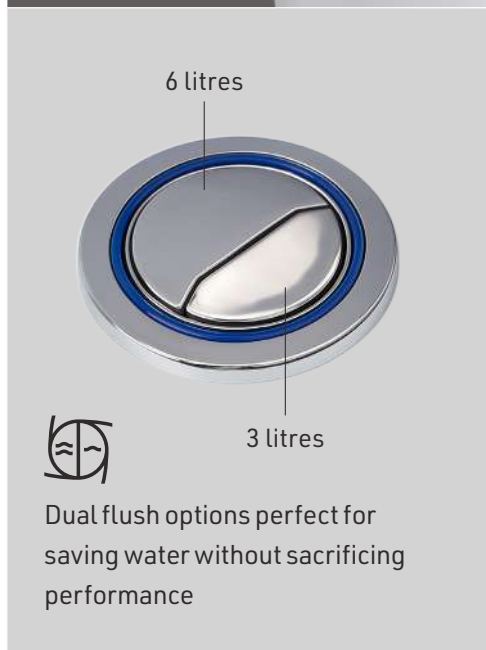

Triple-Layer Ceramic Technology, easy-clean glaze, antibacterial nano coating, high heating process

Each unit is fired at 1,280°C for strong ceramic durability

Soft-close seat & lid add quiet comfort to your daily routine

6 litres

3 litres

Dual flush options perfect for saving water without sacrificing performance

Certified by CIDB Malaysia-compliant and Anqas under ISO 17067:2013. Built to meet international quality standards.
